

Rojan L.Yepes

Junior Full stack web Developer

(PH) 09311784911 • yepesrojan@gmail.com • [_github.com/rohan](https://github.com/rohan) • [rohan-portfolio](#) • [linkedin](#)

Skills

- **Programming** : Java, Python, JavaScript(ES6+), TypeScript
- **Front End** : HTML, CSS, Next.js, React, Tailwind CSS, Frame Motion, Redux, Zustand
- **Back End** : NodeJs, Express, Next.js
- **Dev Tools** : Git, GitHub, VSCode, Figma, Postman
- **Database** : MongoDB, SQLite, MySQL, PostgreSQL
- **Version Control** : Git, Github, NPM, Bash/shell
- **API Testing Tools** : Postman
- **Cloud Computing Technologies** : Google Cloud, Vercel, Mongdb Atlas, Railway, PlanetScale
- **Operating Systems** : Windows, Linux - ubuntu
- **Software** : Web Socket(Socket.io), AdobeXD, Figma, Microsoft Excel, Microsoft Word, Adobe Premiere Pro, Photoshop
- **Other Skills** : Software & Hardware Troubleshooting, UI prototyping, UX/UI Design, Rest API

Professional Summary

Results-oriented Frontend Developer with 1+ years of expertise in React, JavaScript, HTML, CSS, GraphQL, and TypeScript. Specialized in Linux (Ubuntu). Currently excelling at Skin Promenade, prioritizing code maintainability and user satisfaction. Proficient in optimizing data fetching through PostgreSQL. Committed to staying updated on industry trends and contributing to project efficiency with a forward-thinking approach. Additionally, I bring a willingness to learn and enhance my skills in AWS, JIRA, and GraphQL dynamically.

Full Stack Developer @ Skin Promenade | June 2023 - present

- Enhanced project efficiency by 15% through effective utilization of UI Frameworks, leading to a 10% increase in overall team productivity.
- Improved user satisfaction with a 15% decrease in page load times by efficiently managing data fetching and request handling through the integration of TANSTACK queries
- Enhanced developer productivity with a 20% reduction in the time spent passing and managing props across components, allowing for more focused and efficient development workflows

Frontend Developer @ Freelance Comission | October - December 2022

I've utilized Android Studio to develop diverse apps, including a movie booking app, Bookhub/library, and a rice dealership/ordering app. I've ensured data security via hashing, managed user registration with OTP via Nodemailer, and used SQLite for efficient data management. My mobile development experiences have honed my skills, and I'm enthusiastic about further growth in this dynamic field.

Projects
